TERMS AND CONDITIONS OF SALE

TERMS OF PAYMENT:

1. **Cash Plan.** Whereby we book the order, reserve the stock, notifying you a few days prior to shipping time when remittance can be sent and shipment will be forwarded promptly. This cash plan earns 3% discount and free boxing. This is equivalent to between 6 and 8% profit on the goods before you receive them.

2. **Partial Payment Plan.** Whereby 1/3 amount of order is remitted in advance and balance goes forward freight or express C. O. D. payable at destination.

3. **Charge Account Plan.** Goods will be shipped on charge account only to customers of approved credit who supply satisfactory trade and bank reference, allowing time for investigation. Terms 30 days net.

CONDITIONS—We accept all orders upon condition that they shall be void should any injury befall stock from causes over which we have no control. At the moderate price at which we sell our goods we give no warranty except genuineness, expressed or implied, the purchaser assuming all risk and responsibility of the transportation, planting, growth and life of stock. Our responsibility ceases when goods are turned over to carriers. Prices do not include any guarantee as to growth.

BOXING AND PACKING—Boxing and packing will be charged for at actual cost of material used except on cash orders. We make no charge for delivery to the railroad station.

RATES—Five of same variety and size at the ten rate. Fifty of the same variety and size at the 100 rate. Five hundred of the same variety and size at the 1,000 rate.

PRICES—Are limited to Fall, 1924, and supersede all previous lists and ARE SUBJECT TO CHANGE WITHOUT NOTICE.

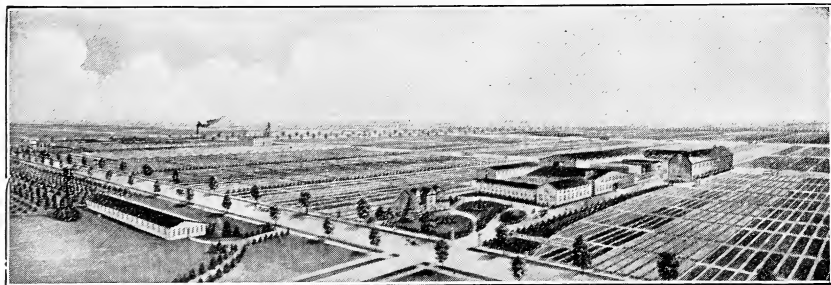

CLAIMS—For any cause will receive consideration only when made within 5 days after the arrival of goods.

SPECIAL NOTICE—Correspondents are requested to use their printed business letterheads. This list is for the trade only and in justice to our trade customers we use every possible effort to limit distribution of trade prices to those we know to be entitled to receive them. USE PRINTED STATIONERY.

LOCATION—We are situated in Northern Illinois, on well drained, rich, fertile soil, located forty-two miles northwest of Chicago. Visitors are always welcome. For complete directions for reaching Nursery see page 32.

STOCK GROWN ON CONTRACT—We are equipped to grow Evergreens and Deciduous Young Stock on contract for future delivery. Get our prices on anything you need. Our 69 years' experience will save you money.

NOTE—Copy of our complete retail descriptive catalog of Evergreens in colors will gladly be sent upon request. Illustrations and descriptions are accurate, authentic and true to life.

A Bird's Eye View of the Hill Nursery

We allow 3% discount and box free when cash accompanies order.

Variety

Each 10

Juniperus Canadensis (J. Communis Depressa)

The well known, valuable, many-stemmed Dwarf Juniper. Rarely exceeds 2 feet in height, good form of Juniper for ground cover. It is at home on sandy or gravelly hillsides fully exposed to the sun, where single plants often reach 15 feet or more in diameter. Is sometimes catalogued as *Juniperus Communis* which is erroneous. The name *Juniperus Communis Depressa* is also applied, which is a synonym. Grows native in various sections of the country, but we obtain our seed from Northern Wisconsin, which is the superior type.

1½-2	“	xxx	3 “ “ “	2.50	22.50

Juniperus Canadensis Aurea (J. Communis Depressa Aurea)

The aurea type is the golden form, similar to the green type except in color. Our plants are reproduced from a carefully selected strain of plants of extra bright golden color, compact growth and of symmetrical form.

1-1½ feet	xx	2 Times Transplanted, B&B.....	2.75	25.00
1½-2 "	xxx	3 " " " ".....	3.25	30.00

Juniperus Chinensis (Chinese Juniper)

One of the very finest hardy plants in cultivation. It forms a compact, pyramidal tree about 20 feet in height, of bright green color with glaucous prickly shoots in the spring. It has never been injured by the most severe winters. It also makes one of the leading Junipers for the South as it stands all kinds of planting conditions with remarkable ability. Its freedom from disease and great adaptability to extremes in temperature make it a most valuable plant.

4-5	“	xxx	3	“ “ “	6.00	55.00

Juniperus Chinensis Fortunei

Foliage deep green. Pyramidal habit and much used for formal effects. A very valuable addition to our list of ornamental Junipers.

1-1½ feet xx 2 Times Transplanted, B&B.....	2.00	17.50
---	------	-------

Juniperus Chinensis Pfitzeriana (Pfitzer's Juniper)

Originated some years ago in Pfitzer's Nursery, near Berlin, Germany. Introduced by Ludwig Spaeth into general cultivation, from whom we obtained our original plants for propagating. A wide, plumose and graceful Evergreen of healthy blue-green foliage. Branches grow horizontal from the stem. Height, 6 to 10 feet.

1½-2	feet	xx	2	Times Transplanted, B&B.....	2.25	20.00

2½-3	“	xxx	3	“ “ “	4.25	40.00

Juniperus Chinensis Procumbens (Japanese Trailing Juniper)

A dwarf variety from Japan, with robust, spreading, procumbent branches and short branchlets. There is considerable variance among varieties offered as Procumbens, but we are careful to propagate only from the true strain consisting of hardy, compact growing plants.

1-1½ feet xxx 3 Times Transplanted, B&B.....	3.00
--	------	-------

Juniperus Chinensis Sargentii (Blue)

First collected by Professor Sargent in Japan in the autumn of 1892. This Juniper forms a low dense mat of wide-spreading branches covered with small dark green scale-like leaves, mixed with pointed ones. In the Arboretum it is now the handsomest of the prostrate Junipers. Free from attack of insects and fungus diseases.

10-12 inch	xx 2 Times Transplanted, B&B.....	2.25	20.00

5 of same variety and size at 10 rate; 50 at 100 rate.

Variety	Each	10
Juniperus Chinensis Stricta This variety partakes of the upright habit of the species, especially when small. It has very attractive glaucous blue foliage. It is a small grower. Very hardy and attractive.		
1-1½ feet xx 2 Times Transplanted, B&B.....	\$2.00	\$17.50
Juniperus Communis Depressa (See <i>Juniperus Canadensis</i>)		
Juniperus Communis Depressa Aurea (See <i>Juniperus Canadensis Aurea</i>)		
Juniperus Communis Hibernica (Irish Juniper) Very formal in outline and invaluable in Italian gardens or where architectural features are to be strongly emphasized. Foliage glaucous green. Not hardy in the extreme north.		
1½-2 feet xx 2 Times Transplanted, B&B.....	2.00	17.50
Juniperus Sabina (Savin Juniper) Native of Central and Southern Europe. Prefers dry, rocky, sunny slopes. Very hardy, growing from 4,000 to 10,000 feet above sea level. Color is a dark green. Good for smoky locations. Low growing shrubby plant.		
1-1½ feet xx 2 Times Transplanted, B&B.....	2.25	20.00
1-1½ " xxx 3 " " " ".....	2.75	25.00
1½-2 " xxx 3 " " " ".....	3.00	27.50
2-2½ " xxx 3 " " " ".....	4.00	37.50

HILL'S WAUKEGAN JUNIPER (*Juniperus Sabina Prostrata*)

An interesting new creeping Juniper. Very low and compact, making a dense mat. Soft blue color in spring and summer, changing to a rich purple color in late fall. It grows close to the ground, not over six to eight inches high, but spreads out a dozen feet or more, depending upon soil and planting conditions. One of Hill's new introductions.

1-1½ feet	xx	2 Times	Transplanted, B&B.....	2.50	22.50
1½-2 "	xxx	3 "	" ".....	3.50	32.50

Juniperus Sabina Pyramidalis

In this form the branches grow erect, making a very attractive bush shaped tree. Foliage has the characteristic green color of the Savin Juniper.

1-1½ feet xx 2 Times Transplanted, B&B.....	2.75	25.00
---	------	-------

Juniperus Sabina Tamariscifolia

This form commonly known as the Spanish Savin makes a low spreading shrub, bearing both juvenile and adult foliage of a glaucous green. It soon covers a wide area. The form which we grow is of the low creeping habit.

10-12 inch	xx	2	Times Transplanted, B&B.....	2.00	17.50
1-1½ feet	xxx	3	“ “ “.....	3.00	27.50

Juniperus Sabina Ven Ehron

A pretty compact, very dwarf form bearing both juvenile and adult branches, upright and wide spreading. Branchlets crowded. This form soon spreads over the ground.

1-1½ feet xx 2 Times Transplanted, B&B.....	2.75	25.00
---	------	-------

HILL'S SILVER JUNIPER (*Juniperus Scopulorum*)

Beautiful silvery blue color. Narrow, compact and symmetrical. It has one single stem, in contrast to some varieties of Junipers with several stems. This makes it safe from heavy snows and wind. The inner foliage does not turn brown. New introduction by D. Hill. This is the seedling form containing both blue and green trees.

2-3 feet xxx 3 Times Transplanted, B&B.....	2.75	25.00
---	------	-------

Juniperus Scopulorum Pyramidalis Viridifolia Hilli

A Hill introduction. A new attractive bright green form. Very columnar habit.

1-1½ feet xx 2 Times Transplanted, B&B.....	3.00	27.50
---	------	-------

Juniperus Virginalis Globosa (Green)

A good globe form with light green foliage, very desirable, hardy and comparatively scarce.

15x15 inch xxx 3 Times Transplanted, B&B.....	3.25	30.00
---	------	-------

Juniperus Virginiana (Red Cedar)

Pyramidal habit, dark green to bluish foliage. Our stock is the hardy northern strain. One of the most useful and characteristic trees of our American landscapes, rivaling the Italian Cypress in beauty. Adapted for planting in all sections of the country. The propagation of this valuable conifer has been a specialty with us for many years and we exercise great care in the selection of our strain of seed. Also used as an understock for grafting Junipers.

5 of same variety and size at 10 rate; 50 at 100 rate.

Variety		Each	10
Juniperus Virginiana Cannarti (Cannarti Juniper)			
Handsome dark green variety, with foliage of deep rich green. Upright grower, reaching 15 to 20 feet. Our plants are propagated by grafting selected scions of Juniperus Virginiana Cannarti on native Juniperus Virginiana root, insuring stock true to name and absolutely hardy.			
1½-2 feet	xx 2 Times Transplanted, B&B.....	\$2.00	\$17.50

4-5	“ xxx 3 “ “ “	6.50	60.00

Juniperus Virginiana Elegants Lee (Lee's Golden Juniper)			
A graceful, upright variety with slightly drooping tendencies, reaching about 10 to 15 feet. Each season the new growth is a rich creamy golden color eventually changing to green. This is one of the most beautiful Junipers. Absolutely hardy, and a good grower.			
1-1½ feet	xx 2 Times Transplanted, B&B.....	2.50	22.50
1½-2	“ xxx 3 “ “ “	3.25	30.00
2-3	“ xxx 3 “ “ “	4.25	40.00

Juniperus Virginiana Filifera			
Compact, pyramidal form having purple plum color in Fall.			
1½-2 feet	xx 2 Times Transplanted, B&B.....	2.75	25.00

Juniperus Virginiana Glauca (Silver Cedar)			
In this variety, the whole of young growths are of almost silvery whiteness, which changes to pale glaucous green in winter. The Juniper Glauca is foremost among the interesting group of Junipers that have been developed from the Juniperus Virginiana (Red Cedar). We constantly strive to improve our strain by careful selection and reproduce only the best types, most true to form, color, compactness and habits of growth. In grafting this tree, we are careful to use for understocks only the dependable Red Cedar, insuring hardness and longevity.

6-7	“ xxx 5 “ “ “	20.00
7-8	“ xxx 5 “ “ “	22.50

Juniperus Virginiana Kosteri			
Semi-dwarf habit, naturally spreading, foliage dense. Good strong grower. Very hardy. Marine blue in color. Forms a wide open bush with erect and spreading, gracefully arching stems from two to three feet tall. This is an unusually handsome plant which will prove useful for the margins of beds of taller growing conifers. This variety probably originated in a European nursery.			
1-1½ feet	xx 2 Times Transplanted, B&B.....	2.00	17.50
2-2½	“ xxx 3 “ “ “	3.25	30.00

Juniperus Virginiana Pyramidaformia Hilli			
This is a new form of pyramidal Juniper which we have developed here in our nursery. It is a very attractive compact, narrow type with a glaucous blue color. Foliage slightly resembles Juniperus Excelsa, but the color and habit are unlike any other variety. This tree is bound to make a place for itself among the Junipers.			
1½-2 feet	2 Times Transplanted, B&B.....	3.25	30.00

Juniperus Virginiana Schotti (Schotti Juniper)			
A valuable dense growing pyramidal form, with rather light green foliage, very hardy, grows 15 to 20 feet high. One of the best of the upright varieties of Juniper, retaining its color all winter.			
1½-2 feet	xx 2 Times Transplanted, B&B.....	2.00	17.50

4-5	“ xxx 3 “ “ “	7.00	60.00
5-6	“ xxx 3 “ “ “	9.00	80.00

Larix Europea (European Larch)			
We obtain our seed from Scotland where the best type is found. In spite of the objection to cones there is a strong demand for the Larch on account of its beautiful effects in early spring and in the fall when the needles turn yellow and golden.			
2-3 feet	xxx 3 Times Transplanted, B&B.....	2.00	17.50

Picea Alba (White Spruce)			
Described by Bailey, the eminent horticulturist. Derives the name White Spruce due to its light frosty green foliage, slightly tinged with blue. Thrives to the best advantage in the cooler climates, north of Philadelphia or St. Louis.” Although native throughout a wide range, the best types prevail throughout Northern Wisconsin, from where our seed is gathered from carefully selected grounds.

5 of same variety and size at 10 rate; 50 at 100 rate.

Variety	Each	10
Picea Canadensis (Black Hill Spruce)		
Somewhat similar and closely related to White Spruce, but much more symmetrical, compact and bushy. Hardest of all Spruces. A native of the Black Hills of South Dakota and first introduced into commercial culture by Mr. D. Hill many years ago, since which time it has been fully tested in all parts of the country and found satisfactory. Foliage varies from green to bluish tint.		
10-12 inch xx 2 Times Transplanted, B&B.....	\$1.25	\$11.00

3-4 " xxx 3 " " "	3.75	35.00

Picea Excelsa (Norway Spruce)

We are growers on the very largest scale of this popular fast growing Evergreen. Seedlings are produced in million lots and our annual transplants now exceed over 500,000 plants every year. Chiefly valuable for screen and farm windbreak planting in the standard grades of twice transplants 10-12 inch, 12-18 inch, and 2-3 feet. Carload lots a specialty. It is also popular for Xmas trees. As the Norway Spruce prevails over a wide range of territory in Europe, there are naturally many sources from which to obtain seed. Our careful experiments and close study of this situation for many years has enabled us to select seed which insures a really superior type of Norway Spruce exactly suited to U. S. A. conditions.

					seed which insures a really superb type or Norway Spruce exactly suited to U. S. A. conditions.

Picea Excelsa Maxwelli (Maxwell Spruce)

A very distinct form raised nearly fifty years ago in the Maxwell Nursery at Geneva, New York. Makes a low rounded cushion the top of which is a mass of stout very short branchlets and thick leaves. Old specimens reach 2 feet high by 4 feet in diameter. The true plant is quite rare.

1½x1½ feet xxx 3 Times Transplanted, B&B.....	4.50
---	------	-------

The Blue Spruce

We are headquarters for this splendid variety, having specialized in them for years, and notwithstanding the unusual demand, have succeeded in building up a magnificent stock (without doubt the largest in America). We offer two types as below, and in ordering from our immense stock of choice trees you may rely upon receiving both in color and form "specimens" in every sense of the word. For prices on Colorado Blue Spruce seedlings and transplants see page 18.

---	---------	----------

Pinus Austriaca (Austrian Pine)

Is sometimes called Black Pine. Has rich, glossy, dark green foliage. Well adapted for planting in cities, as it is highly resistant to smoke. Its native home is in the lower provinces of Austria and also to the Northern half of the Balkan peninsula. A fast growing, dense tree of wonderful adaptability.

Size	Material	Quantity	Unit Price	Total Price

Pinus Cembra (Swiss Stone Pine)

One of the most interesting of Pines, producing edible seeds or nuts. Its growth is slow rarely exceeding one foot each season. It requires but little room on account of its narrow pyramidal habit and is always well furnished with foliage.

1½-2 feet xxx 3 Times Transplanted, B&B.....	3.00
--	------	-------

Pinus Montana Uncinata (Single Stem Mountain Pine)

An upright form of the Mountain Pine found growing naturally in Italy, also abundant in the Spanish Mountains. It differs from the Mugho Pine in that it has a main stem, or leader, which predominates in successive lengths, forming a compact, conical-shaped Pine, broad at the base and tapering at the top.

Variety	Each	10
HILL'S MUGHO PINE (Pinus Mugho Compacta)		
Our own introduction. It is the genuine true dwarf, type, many stemmed, compact, with good dark green color, which it retains throughout the winter. Many inferior forms of this variety offered as Pinus Mugho, are on the market, some of which are loose, open growers and some of upright, irregular habit. The strain we offer is the true dwarf, compact type, and the seed (from the Riesenbirge Range in Silesia), is obtainable only at great expense in small quantity, because of its scarcity. When obtainable, the true seed costs as high as \$15.00 per pound, in contrast to \$1.50 per pound for the common form. Rarely grows over 3 to 6 feet high.		
8-10 inch xx 2 Times Transplanted, B&B.....	\$1.25	\$11.00

1-1½ feet xxx 3 " " "	2.00	17.50
1½-2 " xxx 3 " " "	2.50	22.50

Pinus Ponderosa (Ponderosa Pine)

Sometimes called Bull Pine or Western Yellow Pine. The most widely distributed Evergreen of North America. The type found growing in the Black Hills of South Dakota, from where we obtain our seed, is a much superior type, being a hardy, free, upright grower. Very deep rooted and drought resistant. It is a handsome, ornamental tree, with interesting long needles.

1-1 1/2 feet	xx 2	Times Transplanted, B&B.....	1.00	9.00
1 1/2-2	“ xxx 3	“ “ “ “	1.75	15.00

Pinus Strobus (White Pine)

On account of its rapid growth and low price, White Pine is in heavy demand for landscape screens and backgrounds. We maintain a large stock of well rooted trees.

2-3	feet xxx	3 Times Transplanted,	B&B.....	2.00	17.50
3-4	" xxx	" "	" ".....	2.50	22.50
4-5	" xxx	" "	" ".....	4.25	37.50
5-6	" xxx	" "	" ".....	5.25	47.50

Pinus Sylvestris (Scotch Pine)

We obtain our seed from Sweden where this form grows best and exactly suited to American conditions, in contrast to seed from Southern Germany which is low in price, abundant, but produces very inferior stock.

1-1½ feet	xx	2	Times Transplanted, B&B.....	1.00	9.00
2-3	xxx	3	“ “ “ “	2.00	17.50

Pinus Tanyosha Globosa (Japanese Table Pine)

A really distinct and valuable variety, lately introduced by us from Japan, its native home. Forms a low growing flat top tree. Delicate light green foliage, an interesting acquisition. It is destined to become more popular when better known.

3-3½ feet xxxx 4 Times Transplanted, B&B.....	12.50
---	-------	-------

Taxus Canadensis (American Yew)

1. A valuable dwarf Evergreen, seldom ever growing more than two to three feet above the ground. Has densely clothed dark green foliage. Particularly beautiful in autumn, when loaded with scarlet colored fruits. Thrives well in shade. Can be trimmed to any desired shape. Very hardy. Sometimes called Canadian Yew.

10-12 inch xx 2 Times Transplanted, B&B.....	2.00	17.50
--	------	-------

Taxus Cuspidata (Japanese Yew)

A distinctly valuable Yew, growing 40 to 50 feet high. Under cultivation, somewhat smaller. Has been cultivated throughout Japan from time immemorial, and introduced into America many years ago, having taken its place as one of the most noteworthy and valuable on the entire list, originating in the cold high altitudes of Northern Japan from where we obtain our seed. It is found fully able to successfully withstand extremes of heat and cold in America. Grows close, upright and compact. Foliage dark green, fruit bright scarlet.

1-1½ feet	xx	2 Times Transplanted, B&B.....	2.50	22.50
1½-2 "	xxx	3 " " " "	3.50	32.50

Taxus Cuspidata Brevifolia (Dwarf Japanese Yew)

Similar to *Taxus Cupidata*, but is very dwarfish and compact growing. The foliage consists of little bunches of black green foliage. Of irregular and picturesque outline, ultimately becoming 2 to 3 feet high and 5 or more feet wide. Absolutely hardy. It retains its rich dark green color entirely throughout the winter, which, added to its other points of superiority, makes it one of the most valuable Yews.

Thuya Occidentalis (American Arbor Vitae)

Being the leading and popular Evergreen hedge plant, we grow this variety in large quantities and can furnish twice transplanted sizes in car load lots. This species is also used as an understock for grafting all the different varieties of Thuya. For this purpose the heavier grades of seedlings or the once transplanted size is mainly used. Growing over such a wide range in its native growths, some trees are open growing and undesirable, but we are careful to obtain our seed from Northern sources, producing stock of absolute hardness, good green color and compact habit of growth.

5 of same variety and size at the 10 rate.

Variety	10	100	1000
Abies Magnifica (Red Fir)			
4-6 inch o 2 yr. From Seedling Beds.....	\$.....	\$4.75	\$37.50
Abies Tsuga Canadensis (Hemlock)			
The value of our strain of Hemlocks is based on seed selected from Northern sources only, insuring hardiness and free, graceful upright growth. In the past, European grown plants were mainly propagated from Southern collected seed (from the Carolinas, Tennessee, etc.), because the seed was cheap and easily obtainable. In addition to producing a rather inferior type of tree, when brought to colder climates, it always winter scalded, turned a ragged brown, or killed outright. Our Hemlocks are warranted the genuine Northern strain, and will be found superior to other offerings on the market.			
4-6 inch x Once Transplanted.....		13.50	125.00
1-1½ feet xx Twice Transplanted B&B.....	10.00	90.00
1½-2 " xx " " B&B.....	15.00	125.00
Abies Veitchii (Veitch's Fir)			
Named after John Gould Veitch, an English Nurseryman, who discovered it in Japanese Mountains in 1860. Bright green foliage, silvery white underneath. Of slender habit and average height.			
4-6 inch x Once Transplanted.....		7.50
6-8 " x Once Transplanted.....		11.00	95.00
Biota Orientalis (Chinese Arbor Vitae)			
We have been growing this variety successfully for many years. Our plants are propagated from seed obtained in Northern China,, insuring the genuine pure strain, best adapted for planting in South-eastern, Southern and Pacific Coast States.			
4-6 inch o 1 yr. From Seedling Beds.....		2.25	12.50
6-8 " o 2 yr. " " " ".....		2.75	17.50
8-10 " o 2 yr. " " " ".....		3.50	20.00
Biota Orientalis Aurea Nana			
The plants we offer are the genuine pure strain of Berckman's Golden Arbor Vitae, of much finer coloring and form than many now on the market. Rich deep golden in color. Compact and bushy.			
4-6 inch x Once Transplanted.....		15.00	140.00
Biota Orientalis Bonita			
Broad cone shaped. Beautiful rich deep green. Rather small and of slower growth.			
4-6 inch x Once Transplanted.....		15.00
8-10 " x " " ".....		20.00
Biota Orientalis Compacta			
Light green, compact foliage, with round shape and dwarf habit of growth, similar to Biota Orientalis Aurea Nana, except that it does not have the golden tip to the foliage.			
4-6 inch x Once Transplanted.....		12.50
8-10 " x " " ".....		20.00
Biota Orientalis Elegantissima			
Beautiful golden tipped pyramid.			
4-6 inch x Once Transplanted.....		15.00
Biota Orientalis Pyramidalis			
Of well formed, compact, uniform, pyramidal habit. Broad at base, tapering to point at top, deep green in color.			
4-6 inch x Once Transplanted.....		12.50
Biota Orientalis Texana Glauca			
A beautiful, new biota with soft blue foliage, strong growing, upright pyramidal. A new variety of worthy merit.			
6-8 inch x Once Transplanted.....		17.50
Cedrus Atlantica Argentea			
These plants are grown from seed and offered as nursery run. Contains both blue and green types.			
2-4 inch o 1 yr. From Seedling Beds.....		7.50	62.50
Cedrus Deodara (Himalayan Cedar)			
Feathery artistic blue foliage, considered the most beautiful, ornamental Cedar for the Atlantic, Southern and Pacific Coast States. Deodara is a Hindu word, meaning Tree of the Gods. Almost unrivalled in the grandeur of its pendulous and lithe branches.			
2-4 inch o 1 yr. From Seedling Beds.....		7.50	62.50
Cedrus Libani (Cedar of Lebanon)			
This is a pyramidal form, with dark green color. A very fine decorative tree.			
2-4 inch o 1 yr. From Seedling Beds.....		7.50	62.50
Cupressus Arizona (Arizona Cypress)			
Foliage beautiful, glaucous blue. Handsome, pyramidal growing tree.			
2-4 inch o 1 yr. From Seedling Beds.....		6.00	50.00
Cupressus Lawsoniana (Lawson's Cypress)			
Native Southern Oregon, Northern California. Most beautiful, graceful tree. Delicate, feathery, bluish green foliage. These trees are propagated from seedlings and contain several types.			
4-6 inch o 3 yr. From Seedling Beds.....		6.50	55.00
6-8 " x Once Transplanted.....		12.00
8-10 " x " " ".....		15.00
10-12 " x " " ".....		17.50
12-15 " x " " ".....		20.00

o—Indicates never transplanted. Suitable for bedding out.

Each x indicates one transplanting. B&B signifies balled and burlapped.

13

Variety	10	100	1000
Juniperus Chinensis Sargentii (Green)			
Similar to the blue form except for color which is an attractive green.			
6-8 inch x Once Transplanted.....	\$.....	\$42.50	\$.....
Juniperus Chinensis Stricta (Greek Juniper)			
This variety partakes of the upright habit of the species, especially when small. It has very attractive glaucous blue foliage. It is a small grower, very hardy and attractive.			
6-8 inch x Once Transplanted.....		42.50
1-1½ feet xx Twice Transplanted, B&B.....	(\$2.00 each)	17.50
Juniperus Communis (English Juniper)			
Good upright grower, narrow, pyramidal form, light green foliage. Very popular.			
6-8 inch o 2 yr. From Seedling Beds.....		5.00	37.50
Juniperus Communis Depressa (See <i>Juniperus Canadensis</i>)			
Juniperus Communis Depressa Plumosa			
A variation from the type, being low growing and heavy. A very peculiar reddish purple color during the fall and winter months.			
8-10 inch x Once Transplanted.....	7.50	62.50
Juniperus Communis Hibernica (Irish Juniper)			
Very formal in outline and invaluable in Italian gardens or where architectural features are to be strongly emphasized. Foliage glaucous green. Not hardy in the extreme North.			
18-24 inch xx Twice Transplanted.....	7.50	62.50
1½-2 feet xx " " B&B.....	17.50	165.00
Juniperus Communis Suecica (Swedish Juniper)			
Similar to Irish Juniper, but more hardy. Glaucous green foliage.			
6-8 inch x Once Transplanted.....	17.50	165.00
Juniperus Japonica			
A bushy plant with low spreading fan shaped branches, slightly raised at the top.			
2-4 inch 1 yr. Cuttings.....		12.50
Juniperus Monosperma (Cherrystone Juniper)			
A low growing tree from the hills of southern New Mexico.			
4-6 inch o 2 yr. From Seedling Beds.....	9.00
Juniperus Sabina (Savin Juniper)			
Native of Central and Southern Europe. Prefers dry, rocky, sunny slopes. Very hardy, growing from 4,000 to 10,000 feet above sea level. The Savin Juniper was introduced into British gardens at a very early date, as it is mentioned in Turner's "Names of Herbs" published in 1548. Color is a dark green.			
6-8 inch x Once Transplanted.....		30.00
8-10 " x " " ".....		37.50
1-1½ feet xx Twice Transplanted, B&B.....	2.25	20.00
Juniperus Sabina Prostrata Hilli-Iowa			
This form we secured from a plant found in a cemetery in Iowa. It is distinct in habit, forming a stiff thick stem which grows only two or three inches high and branches out in short branchlets. It is a very desirable prostrate variety.			
6-8 inch x Once Transplanted.....	7.50	62.50

HILL'S WAUKEGAN JUNIPER (*Juniperus Sabina Prostrata*)

An interesting new creeping Juniper. Very low and compact, making a dense mat. Soft blue color in spring and summer, changing to a rich purple color in late fall. It grows close to the ground, not over six to eight inches high, but spreads out a dozen feet or more, depending upon soil and planting conditions. One of Hill's new introductions.

6-8 inch x Once Transplanted.....	37.50
1-1½ feet xx Twice Transplanted, B&B.....	22.50

Juniperus Sabina Pyramidalis

In this form the branches grow erect, making a very attractive bush shaped tree. Foliage has the characteristic attractive green color of the Savin Juniper.

1-1½ feet xx Twice Transplanted, B&B.....	25.00
---	-------	-------	-------

Juniperus Sabina Tamariscifolia

This form commonly known as the Spanish Savin makes a low spreading shrub, bearing both juvenile and adult foliage of a glaucous blue green. It soon covers a wide area. The form which we grow is of low creeping habit.

10-12 inch xx Twice Transplanted, B&B.....	17.50
--	-------	-------	-------

Juniperus Sabina Von Ehron

A pretty, compact, very dwarf form bearing both juvenile and adult branches, upright and wide spreading. Branchlets crowded. This form soon spreads over the ground.

1½-2 feet xx Twice Transplanted, B&B.....	25.00
---	-------	-------	-------

HILL'S SILVER JUNIPER (*Juniperus Scopulorum*)

Beautiful silvery blue color. Narrow, compact and symmetrical. It has one single stem, in contrast to some varieties of Junipers with several stems. This makes it safe from heavy snows and wind. The inner foliage does not turn brown. New introduction by D. Hill. This is the seedling form containing both blue and green trees.

6-8 inch o 2 yr. From Seedling Beds.....	12.50	115.00
--	-------	--------

Juniperus Scopulorum Pyramidalis Viridifolia Hilli

A Hill introduction. A new attractive bright green form. Very columnar habit.

1-1½ feet xx Twice Transplanted, B&B.....	30.00
---	-------	-------

o—Indicates never transplanted. Suitable for bedding out.
Each x indicates one transplanting. B&B signifies balled and burlapped.

Variety	10	100	1000
Juniperus Virginialis Globosa Aurea			
A good globe form with bright golden foliage, very desirable, hardy and comparatively scarce.			
2-4 inch x Once Transplanted.....	\$.....	\$15.00	\$.....

RED CEDAR (*Juniperus Virginiana*)
Platte River Type—Very Uniform

Pyramidal habit, dark green to bluish foliage. Our stock is the hardy northern strain. One of the most useful and characteristic trees of our American landscapes, rivaling the Italian Cypress in beauty. Adapted for planting in all sections of the country. The propagation of this valuable Conifer has been a specialty with us for many years and we exercise great care in the selection of our strain of seed. Also used as an understock for grafting Junipers.

Juniperus Virginiana Cannarti (Cannarti Juniper)

Handsome dark green variety, with foliage of deep rich green. Upright grower, reaching 15 to 20 feet. Our plants are propagated by grafting selected scions of *Juniperus Virginiana* Cannarti on native *Juniperus Virginiana* root, insuring stock true to name and absolutely hardy.

1½-2 feet xx Twice Transplanted, B&B.....	(\$2.00 each)	\$17.50	\$150.00	\$.....
---	---------------	---------	----------	---------

Juniperus Virginiana Elegants Lee (Lee's Golden Juniper)

A graceful, upright variety with slightly drooping tendencies, reaching about 10 to 15 feet. Each season the new growth is a rich creamy golden color eventually changing to green. This is one of the most beautiful Junipers. Absolutely hardy, and a good grower.

1-1½ feet xx Twice Transplanted, B&B.....	(\$2.50 each)	22.50
---	---------------	-------	-------	-------

Juniperus Virginiana Filifera

Compact, pyramidal form having purple plum color in fall.

1½-2 feet xx Twice Transplanted, B&B.....	25.00
---	-------	-------	-------

Juniperus Virginiana Glauca (Silver Cedar)

In this variety, the wile of young growths are of almost silvery whiteness, which changes to pale glaucous green in winter. The Juniper Glauca is foremost among the interesting group of Junipers that have been developed from the Juniperus Virginiana (Red Cedar). We constantly strive to improve our strain by careful selection and reproduce only the best types, most true to form, color, compactness and habits of growth. In grafting this tree, we are careful to use for understocks only the dependable Red Cedar, insuring hardness and longevity.

1-1½ feet xx	Twice Transplanted, B&B.....	(\$1.75 each)	15.00	140.00
1½-2 " xx	" " " B&B.....	(\$2.00 each)	17.50	150.00

Juniperus Virginiana Kosteri

Semi-dwarf habit, naturally spreading, foliage dense. Good strong grower. Very hardy. Marine blue in color. Forms a wide open bush with erect and spreading, gracefully arching stems from two to three feet tall. This is an unusually handsome plant which will prove useful for the margins of beds of taller growing conifers. This variety probably originated in a European nursery.

8-10 inch x Once Transplanted.....	42.50
1½-2 feet xx Twice Transplanted, B&B..... (\$2.00 each)	17.50

Juniperus Virginiana Pyramidaformia Hilli

This is a new form of pyramidal Juniper which we have developed here in our nursery. It is a very attractive compact, narrow type with a glaucous blue color. Foliage slightly resembles *Juniperus Excelsa*, but the color and habit are unlike any other variety. This tree is bound to make a place for itself among the Junipers.

1½-2 feet xx Twice Transplanted, B&B.....	17.50
---	-------	-------	-------

Juniperus Virginiana Schotti (Schotti Juniper)

A valuable dense growing pyramidal form, with rather light green foliage, very hardy, grows 15 to 20 feet high. One of the best of the upright varieties of Junipers, retaining its color all winter.

1-1½ feet xx Twice Transplanted, B&B.....	(\$2.00 each)	17.50	165.00
---	---------------	-------	--------	-------

Larix Europea (European Larch)

We obtain our seed from Scotland where the best type is found. In spite of the objection to cones there is a strong demand for the Larch on account of its beautiful effect in early spring and in the fall when the needles turn yellow and golden.

Picea Alba (White Spruce)

Described by Bailey, the eminent horticulturist, as "A native of the Northern Parts of America. Derives the name White Spruce due to its light, frosty green foliage, slightly tinged with blue. Thrives to the best advantage in the colder climates, north of Philadelphia or St. Louis." Although native throughout a wide range, the best types prevail throughout Northern Wisconsin, from where our seed is gathered from carefully selected grounds.

Variety	10	100	1000
Picea Canadensis (Black Hill Spruce)			
Somewhat similar and closely related to White Spruce, but much more symmetrical, compact and bushy. Hardest of all Spruces. A native of the Black Hills of South Dakota and first introduced into commercial culture by Mr. D. Hill many years ago, since which time it has been fully tested in all parts of the country and found satisfactory. Foliage varies from green to bluish tint.			
4-6 inch o 3 yr. From Seedling Beds.....	\$.....	\$6.00	\$50.00

Picea Engelmanni (Engelman Spruce)

One of the natives of the Rocky Mountains of Colorado. Resembles *Picea Alba* more than it does its near neighbor *Picea Pungens*, being of finer foliage and not such stiff branches as the latter.

4-6 inch o 2 yr. From Seedling Beds.....	4.75	37.50	
--	------	-------	--

NORWAY SPRUCE (*Picea Excelsa*)

We are growers on the very largest scale of this popular fast growing Evergreen. Seedlings are produced in million lots and our annual transplants now exceed over 500,000 plants every year. Chiefly valuable for screen and farm windbreak planting in the standard grades of twice transplants 10-12 inch, 12-18 inch, and 2-3 feet. Carload lots a specialty. It is also popular for Xmas trees. As the Norway Spruce prevails over a wide range of territory in Europe, there are naturally many sources from which to obtain seed. Our careful experiments and close study of this situation for many years has enabled us to select seed which insures a really superior type of Norway Spruce exactly suited to U. S. A. conditions.

1-1½ feet xx Twice Transplanted, B&B.....	17.50

HILL'S MUGHO PINE**(Pinus Mugho Compacta) True Dwarf Type**

Our own introduction. It is the genuine true dwarf type, many stemmed, compact, with good dark green color, which it retains throughout the winter. Many inferior forms of this variety offered as Pinus Mugho, are on the market, some of which are loose, open growers and some of upright, irregular habit. The strain we offer is the true dwarf, compact type, and the seed (from the Riesenbirge Range in Silesia), is obtainable only at great expense in small quantity, because of its scarcity. When obtainable, the true seed costs as high as \$15.00 per pound, in contrast to \$1.50 per pound for the common form. Rarely grows over 3 to 6 feet high.

Pinus Ponderosa (Ponderosa Pine)			
Sometimes called Bull Pine or Western Yellow Pine. The most widely distributed Evergreen of North America. The type found growing in the Black Hills of South Dakota, from where we obtain our seed, is a much superior type, being a hardy, free, upright grower. Very deep rooted and drought resistant. It is a handsome, ornamental tree, with interesting long needles.

Pseudolarix Kaempferi (Chinese Golden Larch)
Very slender and pyramidal with horizontal branches. Beautiful light green foliage, changing to golden in the Fall. Very desirable. This is a deciduous conifer, losing its leaves in winter. Free from cones.

4-6 inch x Once Transplanted.....	25.00
-----------------------------------	-------

Retinospora Filifera Aurea
Of Japanese origin and held highly sacred in the Orient. The new growth is a rich golden hue, eventually changing to green, being borne on somewhat pendulous branches.

8-10 inch x Once Transplanted.....	27.50
------------------------------------	-------

Retinospora Filifera (Green)
A remarkably decorative tree, the branches thread-like, gracefully pendulous and much elongated.

6-8 inch x Once Transplanted, From Flats.....	15.00
8-10 " x " " " " ".....	17.50

Retinospora Pisifera (Green)
Of Japanese origin, very vigorous and quite hardy. This is a variety also used for miniature gardens and in pots.

6-8 inch x Once Transplanted.....	17.50
-----------------------------------	-------

Retinospora Pisifera Aurea
The new growth is rich golden yellow, eventually changing to greener hues. Very distinct and showy.

6-8 inch x Once Transplanted.....	17.50
-----------------------------------	-------

o—Indicates never transplanted. Suitable for bedding out.
Each x indicates one transplanting. B&B signifies balled and burlapped.

Variety	10	100	1000
Thuya Occidentalis Compacta (Parson's Compacta Arbor Vitae)			
There is a considerable mixture in this variety in nurseries throughout the country, but we continue to confine our propagation to the true Parson's form originated by Parson's. It is of slow growth, broad and compact and very hardy of charming oval form.			
6-8 inch x Once Transplanted.....	\$.....	\$25.00	\$.....
Thuya Occidentalis Douglassi Aurea (Douglas Golden Arbor Vitae)			
A really valuable Golden form originated by Robert H. Douglas. A good golden color, not so bright as Peabody's, but a superior grower forming a broad bushy heavy specimen.			
8-10 inch x Once Transplanted.....		27.50
1-1½ feet xx Twice Transplanted, B&B.....	15.00		
Thuya Occidentalis Douglassi Pyramidalis (Douglas Pyramidal Arbor Vitae)			
A comparatively new variety, chiefly valuable on account of its crested foliage, deep dark green in color. Reaches a height of 12 to 15 feet.			
6-8 inch x Once Transplanted.....	25.00
Thuya Occidentalis Ellwangeriana (Tom Thumb Arbor Vitae)			
A low, broad pyramid, with the slender branches clothed with two kinds of foliage, juvenile and adult. A very interesting and valuable variety, being an intermediate form between the variety <i>Ericoides</i> and the type.			
6-8 inch x Once Transplanted.....	25.00
o-Indicates never transplanted. Suitable for bedding out.			
Each x indicates one transplanting. B&B signifies balled and burlapped.			

Variety	70	80	90
Thuya Occidentalis Globosa Nova A valuable new variety fully tested. Round, bushy and compact. Good green color, very hardy. On account of its many new qualities, is bound to supersede many of the so-called globosa forms.			
6-8 inch x Once Transplanted.....	\$.....	\$25.00	\$.....
Thuya Occidentalis Hoveyi (Hovey's Arbor Vitae) A semi-dwarf, compact grower. Foliage dark green. Our stock is guaranteed true strain, which we have been growing for a great many years. Very hardy.			
6-8 inch x Once Transplanted.....	25.00
Thuya Occidentalis (Little Gem) One of the old well known dwarf forms similar to Thuya Compacta, but smaller and finer in every respect, the branchlet sprays being about three inches long by two inches across, the whole forming a small compact ball.			
10-12 inch xx Twice Transplanted, B&B.....	15.00	135.00
Thuya Occidentalis Lutea (Peabody's Golden Arbor Vitae) A distinct golden type, which we have been able to improve considerably by closer selection, propagating only the brightest golden color, producing plants of exceptional merit. Rather slender in habit, reaching 12 to 15 feet high with a diameter of 2 to 2½ feet.			
6-8 inch x Once Transplanted.....	25.00
HILL'S PYRAMIDAL ARBOR VITAE (Thuya Occidentalis Pyramidalis) Our own introduction. Our carefully selected strain which we have improved through years of careful selection and propagation, is of noteworthy value, being the genuine narrow, pyramidal type. It is an especially hardy, vigorous grower, forming a compact, narrow column of dense, dark green foliage.			
6-8 " " x Once Transplanted.....	22 50	210.00
8-10 " " x " " "	27.50	260.00
Thuya Occidentalis Recurva Dwarf, globe shaped, forming a perfect ball. Attaining height of 3x3 feet at maturity. Handsome dark green color.			
6-8 inch x Once Transplanted.....	25.00
Thuya Occidentalis Recurva Nana Dwarf, globe shaped, forming a perfect ball. Attaining height of 3x3 feet at maturity. Handsome dark green color.			
6-8 inch x Once Transplanted.....	27.50
Thuya Occidentalis Rosenthalii A broad, symmetrical pyramid. Rich dark green. Medium grower.			
10-12 inch xx Twice Transplanted, B&B.....	12.50	110.00
1-1½ feet xx " " B&B.....	15.00	140.00
Thuya Occidentalis Spicata Alba (Hill's White Tipped Arbor Vitae) Tips of young shoots creamy white. Very desirable.			
6-8 " " x Once Transplanted.....	27.50
10-12 " " xx Twice Transplanted.....	6.50	50.00
Thuya Occidentalis Umbraculifera Of smaller and denser habit than the type, branchlets slendrer, with yellowish foliage, bronzy in winter.			
6-8 inch x Once Transplanted.....	22.50
Thuya Occidentalis Vervaeanae Light golden. Natural pyramidal habit, compact in outline. Attains great beauty as the tree develops.			
6-8 inch x Once Transplanted.....	25.00
Thuya Occidentalis Wareana Siberica (Siberian Arbor Vitae) This well known variety is well worthy of its wide popularity, combining as it does excessive hardness, regular conical outline, and a peculiar dark green and remarkably dense foliage. Very compact grower.			
6-8 " " x Once Transplanted.....	27.50
Thuya Occidentalis Woodwardi (Woodward's Globe Arbor Vitae) Without doubt one of the best globe forms on the list. Originated and introduced by Mr. Jacob Manning, Proprietor of the Reading Nurseries, Reading, Massachusetts, and named after his son, J. Woodward Manning. A few plants presented by the introducer shortly before his death to D. Hill, form the basis of our stock. Therefore, we can justly say that our stock is the true strain.			
6-8 inch x Once Transplanted.....	25.00
10-12 " " xx Twice Transplanted, B&B.....	12.50	110.00
Thuya Plicata Gigantea A dense pyramidal grower. Branchlet systems rigid, taking an erect and parallel position like those of Thuya Orientalis.			
4-6 inch o 2 yr. From Seedling Beds.....	2.75	17.50
Tsuga Canadensis (Hemlock). (See Abies Tsuga Canadensis).

Deciduous Lining Out Stock

Shade Trees, Shrubs and Vines

The propagation of deciduous young stock is a department we have given special attention. The installation of special equipment, such as overhead watering systems, etc., gives our stock unusual vigor and stockiness. Note: Orders should call for 50 of a size and variety or multiples of 50.

Variety	100	1000
Acer Platanoides (Norway Maple)		
We grow the compact, hardy type from northern seed. This is one of the best of all street trees and shade trees.		
6-8 inch o 2 yr.....	\$6.00	\$45.00
8-10 " o 2 yr.....	7.50	62.50
10-12 " o 2 yr.....	9.00	75.00
Acer Saccharum (Hard or Sugar Maple)		
Large stately, upright tree of dense habit, thriving in almost any soil. Valuable for its beautiful autumn colors and for its wide use as a street and lawn tree.		
8-10 inch o 2 yr.....	4.00	30.00
10-12 " o 2 yr.....	4.50	37.50
Alnus Glutinosa (European or Black Alder)		
Vigorous and rapid growing tree. Native of Europe and Asia. Leaves dull dark green, the border irregularly toothed turning yellow in autumn. Of great value for planting in damp cold ground.		
10-12 inch o 2 yr.....	4.00	30.00
12-18 " o 2 yr.....	5.00	45.00
Alnus Incana (Speckled or Hoary Alder)		
Large shrub or small tree. Leaves oval, fine toothed, dark green above, pale or glaucous beneath. Valuable for waterside planting or wet ground.		
10-12 inch o 2 yr.....	4.00	37.50
12-18 " o 2 yr.....	5.00	42.50
Amelanchier Canadensis (Shadbush)		
A tree with small spreading branches and slender branchlets. Leaves reddish brown at time of unfolding, eventually turning dark green. Pure white flowers, bright red fruit turning to dark purple. Very beautiful tree and one of the earliest to bloom.		
10-12 inch x Once Transplanted.....	9.00
Aronia Melanocarpa (Black Chokeberry)		
A very ornamental shrub which produces abundance of black berries. It is especially attractive when planted in connection with the Aronia Arbutifolia (Red Chokeberry).		
10-12 inch o 2 yr.....	6.00	50.00
Aucuba Japonica (Green) (Japanese Aucuba)		
A medium sized evergreen shrub with dark glossy green leaves, unaffected by smoke and dust. Berries scarlet. Not hardy in northern states.		
4-6 inch x Once Transplanted.....	12.50	110.00
Berberis Thunbergii (Japanese Barberry)		
This is a specialty with us. We annually grow large quantities from selected seed which is propagated under our overhead watering system. We are thus able to produce seedlings of good, thrifty character. These seedlings will be sure to please you.		
8-10 inch o 1 yr.....	2.25	12.50
Betula Alba (White Birch) Write for size and prices.		
We grow this variety principally for understocks for budding. Sizes are only approximate. All orders accepted subject to grading of stock at end of growing season.		
Calycanthus Floridus (Sweet Shrub)		
Flowers reddish brown, sweet scented, profusely borne in late spring and early summer. Grows 4 to 6 feet high.		
8-10 inch o 1 yr.....	7.50
Chioanthus Virginica (White Fringe Tree)		
A shrub or low tree with dark green leaves forming an oblong narrow head. Flowers appear when leaves are almost grown out, white in loose drooping panicles. Fruit blue, resembling a small plum. Flowers are exceedingly feathery and graceful.		
10-12 inch x Once Transplanted.....	9.00
Colutea Arborescens (Common Bladder—Senna)		
A tall shrub, native of Europe. Flowers yellow, more or less tinged with reddish brown, soon followed by large inflated, often highly colored seed pods. Very attractive and ornamental.		
8-10 inch o 1 yr.....	9.00
Cornus Florida (Flowering Dogwood)		
Small bushy tree with upright or spreading branches. Leaves oval, light green turning scarlet in the autumn. Flowers white often tinged with pink. Fruit bright scarlet.		
6-8 inch o 1 yr.....	6.00	50.00
Cornus Paniculata (Gray Dogwood)		
Gray branches, leaves dull green, whitened beneath. Flowers white. Fruit white borne on deep red stems.		
8-10 inch o 1 yr.....	5.50	45.00
Cornus Spaethii Aurea		
Golden variegated form, medium grower.		
10-12 inch x Once Transplanted.....	9.00

e—indicates never transplanted. Each x indicates one transplanting.
50 of same variety and size at 100 rate; 500 at 1000 rate.

Variety	100	1000
Crataegus Oxycantha (English Hawthorn)		
This is an ideal understock for budding as it has no thorns, and also is a good rapid grower. It produces single white flowers, very attractive, and is also suitable for hedges.		
6-8 inch o 1 yr.....	\$ 4.00	\$30.00
Deutzias. We grow a complete line of Deutzias including many of Lemoine's choice varieties and these are offered on page 27.		
Evonymus Alata (Winged Evonymous)		
A handsome shrub 6 to 8 feet tall. Native of China and Japan. Bright green leaves fading in autumn to red and crimson tones. Very attractive as a specimen shrub.		
8-10 inch x Once Transplanted.....	8.50	75.00
Evonymus Americanus (Brook Evonymus)		
An erect shrub with slender green branches 5 to 8 feet tall. Fruit warty, rose colored with scarlet seed coats. Very showy.		
8-10 inch x Once Transplanted.....	9.50	85.00
Evonymus Europaeus (European Burning Bush)		
A large erect shrub or low tree 10 to 15 feet tall. Flowers yellowish, fruit rose-pink. The seeds are infested with orange colored arils.		
6-8 inch o 1 yr.....	7.00	60.00
Evonymus Radicans Vegetus (Big Leaf Winter Creeper)		
A pretty trailing evergreen vine. Produces an abundance of showy red fruit and yellow pods.		
6-8 inch x Once Transplanted.....	12.50	115.00
Fraxinus Americana (American White Ash)		
Genuine American White Ash, true free growing form. Good under-stock for grafting Lilacs. Does not sucker.		
18-24 inch o 2 yr.....	2.00	12.50
2-3 feet o 2 yr.....	2.50	15.00
Hydrangea Paniculata Grandiflora (Large Flowered Hydrangea)		
No doubt this is the most popular shrub and one of the showiest in cultivation. Produces large panicles of white flowers which soon take on tones of rose and bronze on the exposed side.		
8-10 inch x Once Transplanted.....	9.00	80.00
Ilex Crenata (Japanese Holly)		
An intricately branched shrub or small tree. Native of Japan. Leaves small in size and shaped similar to Boxwood. Has black berries. Withstands temperature of around zero.		
4-6 inch o 2 yr.....	7.50
Ilex Pedunculosa (Long Stalk Holly)		
In Japan this is a small tree sometimes 20 or 30 feet tall, or more often a shrub. The leaves resemble in shape those of our Wild Cherry, and the handsome red fruit is borne on long stalks and is very ornamental.		
8-10 inch o 2 yr.....	7.50
Koelreuteria Paniculata (Varnish Tree)		
A small tree with a round head, 20 or 30 feet tall. Native of China and Japan. Leaves are reddish purple at time of unfolding, at maturity bright lustrous green shaded with exquisite yellow, crimson and black. Has yellow flowers followed by clusters in plaited triangular pods. When used in groups and planted with other shrubs the effect is very pleasing.		
8-10 inch o 3.75	3.75	37.50
Ligustrum Amurense (Amoor River Privet-North)		
We are suppliers of this item in carload lots and can furnish any grade desired for either lining out or hedge purposes.

Ligustrum Regelianum (Regals Privet)		
A low spreading form with graceful drooping branches. Can be used much the same as Japanese Barberry. True form from dark green spreading type.		
8-10 inch x Once Transplanted.....	7.25	62.50
Mahonia Aquifolium (Oregon Grape)		
Also known as Holly-leaved Barberry. Small spiny toothed leaves of dark lustrous green which change to bronze and reddish hue. In the winter has blue or nearly black berries.		
4-6 inch o 4.00	4.00	30.00
Malus. For complete assortment of Malus see page 28.		
Nandina Domestica		
Stiff upright habit, occasionally reaching 6 or 8 feet. Leaves are a rich red when young, turning dark green and coppery when matured. Flowers white in panicles.		
3-6 inch x Once Transplanted.....	7.50
Pachysandra Terminalis (Japanese Spurge)		
A splendid evergreen ground cover with thick glossy foliage, forming a dense mat, making low growing cover plant. Also excellent for edging. It is hardy and does well in dense shade.		
6-8 inch x Once Transplanted.....	7.25	62.50
Philadelphus Boquet Blanc		
Double white flowers, thick clusters.		
8-10 inch x Once Transplanted.....	9.00
o—indicates never transplanted. Each x indicates one transplanting. 50 of same variety and size at 100 rate; 500 at 1000 rate.		

	Variety	100	1000
Philadelphus Coronarius Aurea (Golden Mock Orange)	A form with yellow foliage, much prized for its bright effect.		
8-10 inch x Once Transplanted.....		\$7.25	\$62.50
Philadelphus Pekinensis Brachybotrys	From northern China and Mongolia. A stout bush rather broader than high which every year produces great quantities of small flowers tinged with yellow.		
8-10 inch x Once Transplanted.....		12.50
Prunus Davidiana (Amygdalus) (Chinese Wild Peach)	A blight resisting understock for budding Peaches, Plums, Apricots and Almonds. Also attractive as an ornamental plant, producing an abundance of flowers.		
12-18 inch o 1 yr.....		7.25	62.50
Prunus Triloba (Flowering Plum)	Flowers double pink or rose colored appearing just before the leaves unfold. Very profuse and showy.		
12-18 inch x Once Transplanted.....		8.50	75.00
Quercus Alba (White Oak)	One of the finest Oaks for lawn or landscape, attaining great age.		
6-8 inch o 1 yr.....		6.50
Quercus Rubra (American Red Oak)	An excellent street tree and one of the most rapid growing Oaks. We obtain our seed from Northern Michigan where the best type seems to prevail. Leaves of the Red Oak are dull green and turn orange and brown in the Fall.		
6-8 inch o 1 yr.....		5.50	45.00
Rhus Aromatica (Fragrant Sumac)	Heavily branched spreading shrub. Two to four feet tall. Bright red fruit with short silky hairs.		
10-12 inch o 2 yr.....		7.50
Spiraea Anthony Waterer	A free flowering variety of dwarfish habit which bears bright rosy-red flowers continually until Fall.		
6-8 inch x Once Transplanted.....		8.50	75.00
Syringa (Lilac). See pages 26 and 27 for complete assortment including many choice named varieties.			
Tilia Americana (American Linden or Basswood)	This is the most common American species and best for general use.		
6-8 inch o 2 yr.....		6.00	50.00
Viburnum Acerifolium (Maple Leaved Viburnum)	Maple-like bright green leaves fading with handsome purple tones in the autumn. Flowers creamy or yellowish white. Blooms early. Berries black. Slender upright habit, 3 to 5 feet tall.		
6-8 inch x Once Transplanted.....		7.50	65.00
Viburnum Americanum (American Highbush Cranberry)	Handsome native shrub. Very decorative in fruit which begins to color by the end of July. Remains on the branches and keeps its bright scarlet color until the following spring. Not eaten by birds.		
4-6 inch o 1 yr.....		6.00	50.00
6-8 " x Once Transplanted.....		8.50	75.00
Viburnum Cassinoides (Withe Rod)	Very hardy, free flowering shrub with upright branches. Flowers creamy or yellowish white. Berries pink, changing to dark blue. Four to eight feet.		
4-6 inch o 2 yr.....		6.00	50.00
6-8 " x Once Transplanted.....		7.50
10-12 " x " ".....		9.00
Viburnum Dentatum (Arrowwood)	A bushy shrub. Leaves heart shaped, bright green coarsely toothed border. Very symmetrical in growth. Height, 8 to 12 feet. Blue black berries. Flowers creamy white.		
4-6 inch o 1 yr.....		4.75	37.50
8-10 " x Once Transplanted.....		7.00	60.00
Viburnum Lantana (Wayfaring Tree)	A large shrub 10 to 15 feet. Leaves heart shaped, wrinkled, dark green above, downy beneath. Berries bright red changing to black.		
6-8 inch o 2 yr.....		6.00	50.00
Viburnum Lentago (Nanny Berry)	Shrub or small tree reaching 30 feet. Retains its bluish-black fruit all winter.		
4-6 inch o 2 yr.....		6.00	47.50
Viburnum Molle (Kentucky Virburnum)	Somewhat similar to Viburnum Dentatum. Blooms two or three weeks later.		
6-8 inch x Once Transplanted.....		6.00	50.00
Viburnum Opulus (Highbush Cranberry)	A tall upright growing shrub 8 to 10 feet tall. Flowers white with flat top clusters in late spring and early summer. Berries scarlet, persisting all winter, very showy.		
4-6 inch o 1 yr.....		5.50	45.00
6-8 " x Once Transplanted.....		7.25	62.50
Viburnum Opulus Aurea	Attractive new golden form.

50 of same variety and size at 100 rate; 500 at 1000 rate.

NEW Hill's Silver Juniper

(*Juniperus Scopulorum*)

A comparatively new introduction from the Rocky mountains by D. Hill, which we have during the past few years thoroughly tested in various sections of the country and found entirely satisfactory. It is absolutely hardy in the North and also well adapted to Southern conditions.

Many testimonials from leading firms and individuals confirm its worth. It is a beautiful, symmetrical, narrow pyramidal Juniper with the silvery blue color of the Blue Spruce; good grower and can be propagated from seed or rooted cuttings.

It has one single stem, in contrast to some varieties of Junipers with several stems. This makes it safe from heavy snow and wind. The inner foliage does not turn brown, but remains a good, healthy color throughout the year.

Additional distinct types are also being propagated and will be ready for distribution soon. Secure a stock of these trees now and learn more about the coming Silver Juniper. This is the seedling form producing both blue and green trees.

Special Offer No. 1

Hill's Mugho Pine

(Pinus Mugho Compacta)

1 to 1½ Feet

BALLED AND BURLAPPED

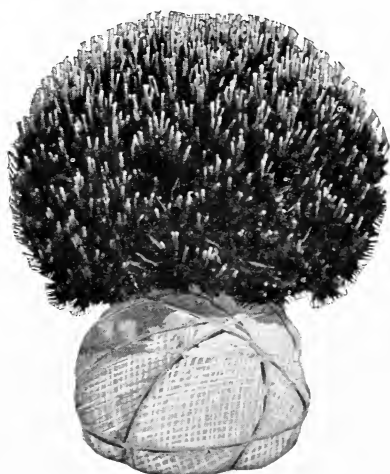

\$2.00 Each

\$17.50 per 10

This is the genuine true dwarf type, many stemmed, compact, with good dark green color, which it retains throughout the winter. The branches in the Spring tipped with the new growth, closely resemble tiny candlesticks over the entire tree.

Truly a sensational triumph in Evergreen growing. Described by an eminent horticulturist as a "marvel of rich beauty." It grows to perfection in all parts of the country and is absolutely hardy.

Hill's New Introduction

HILL'S MUGHO PINE
(*Pinus Mugho Compacta*)

Hill's Choice Lilacs

Choice Named Varieties

The popularity of the Lilac is on the increase and many new and interesting forms are continually being brought out, both at the Arnold Arboretum in Boston and in the Rochester New York Parks Arboretum. These two collections are no doubt the largest in the world. No floral display draws such attention from large crowds as the Lilacs when in flower.

We have been supplied with wood for propagating from practically all new varieties and now have a most complete and valuable collection. Many new varieties will be ready each season as our stock develops. Great credit is due Mr. John Dunbar, Assistant Superintendent of Parks and Arboriculturist, Rochester, New York, for his painstaking efforts both in the introduction of new varieties and in classifying and supplying of accurate descriptions. We offer several species as well as a good number of choice named varieties all on their own roots.

Variety	100
Syringa Amurensis (Siberian Lilac)	
This is a native of eastern Siberia and is a shrub in habit 12 or 15 feet high with dark close bark, broad and unsymmetrical. Pale lavender flowers. This is the first of the tree Lilacs to flower.	
6-8 inch x Once Transplanted.....	\$10.00

Syringa Persica (Purple Persian Lilac)	
Was known in England as early as 1658 and has been for a long time an inhabitant of American gardens. It is a beautiful hardy plant, with slender drooping, wide spreading branches. The leaves are narrower than those of the common Lilac. The flowers are small, fragrant lavender colored in short compound clusters. Although known as Persian Lilac it is believed that this shrub came originally from China.	
8-10 inch 1 yr. Cuttings.....	7.50

Syringa Persica Alba (White Persian Lilac)	
In general the same description applies on this variety as on Purple Persian Lilac. The flowers, however, are pure white and very fragrant.	
8-10 inch 1 yr. Cuttings.....	7.50

Syringa Villosa (Himalayan Lilac)	
This is a large round topped bush from 10 to 12 feet tall and wide, with large broad oblong leaves, dull on the upper surface and pale below. Has narrow clusters of flesh colored or nearly white flowers. It is a good garden plant, the habit is excellent. It flowers freely every year and the flowers do not open until most of the other Lilacs have faded.	
3-8 inch x Once Transplanted.....	12.50

Syringa Vulgaris (Purple Lilac)	
This is the familiar purple or "common" Lilac. Blooms in May. Grows 8 to 20 feet. Where hybrid forms are propagated the following sizes will be found suitable for budding or grafting.	
6-8 inch o 2 yr.....	(per 1000, \$45.00) 5.50
8-10 " o 2 yr.....	(per 1000, \$55.00) 6.50
8-10 " x Once Transplanted.....	(per 1000, \$60.00) 7.00
10-12 " x " " ".....	(per 1000, \$75.00) 8.50

Syringa Vulgaris Chas. Joly	
Double flowering. Dark purple wine blossoms with silvery reverse.	
6-8 inch x Once Transplanted.....	17.50
10-12 " x " " ".....	20.00
12-18 " x " " ".....	22.50

Syringa Vulgaris Chas. X.	
Single, lilac red. Time of blooming, medium. One of the most striking of the dark red varieties.	
6-8 inch x Once Transplanted.....	17.50
10-12 " x " " ".....	20.00
12-18 " x " " ".....	22.50

Syringa Vulgaris Congo	
One of the older varieties. Large dark red purple single flowers.	
10-12 inch x Once Transplanted.....	22.50

Syringa Vulgaris Mad. Casimir Perier	
Finest double white Lilac. Individual flowers as well as trusses are of immense size. Blooms early. Good variety for forcing.	
8-10 inch x Once Transplanted.....	17.50
10-12 " x " " ".....	22.50

Syringa Vulgaris Mad. Florent Stepman	
Extra large pyramidal trusses of single pure white flowers. Time of blooming, medium.	
10-12 inch x Once Transplanted.....	27.50

Syringa Vulgaris Mad. Lemoinei	
Double white. Blooms early. Extra large panicles.	
8-10 inch x Once Transplanted.....	20.00
12-18 " x " " ".....	22.50

Each x indicates one transplanting. 50 of same variety and size at 100 rate; 500 at 1,000 rate.

Lemoines New Deutzias

Variety	100	1000
Deutzia Crenata Eburnea Single white flowers, produced in great profusion, borne in light and graceful clusters. 6-8 inch x Once Transplanted.....	\$7.25	\$62.50
Deutzia Crenata Insignis Branches slender and black, clusters of a peculiar form, double white flowers with brown pedicels and sepals. 6-8 inch x Once Transplanted.....	6.50	55.00
Deutzia Crenata Magnifica This sort begins to flower in the last week of May, a fortnight before the older varieties of D. Crenata. Handsome well expanded full of white flowers produced in the great profusion. 6-8 inch x Once Transplanted.....	7.25	62.50
Deutzia Gracilis The well known Japanese species. Small, usually about two feet tall. White flowers. 6-8 inch x Once Transplanted.....	6.50	55.00
Deutzia Gracilis Campanulata 6-8 inch x Once Transplanted.....	6.50	55.00
Deutzia Gracilis Fastuosa Long spikes with 20 to 25 upright flowers, milk white. Fine for forcing. 6-8 inch x Once Transplanted.....	7.50
Deutzia Gracilis Multiflora Low spreading shrub with white flowers. 6-8 inch x Once Transplanted.....	8.50	75.00
Deutzia Lemoinei A small shrub with spreading branches, usually about 3 feet tall. Leaves light green two to three inches long. White flowers in large clusters. 6-8 inch x Once Transplanted.....	8.50	75.00
Deutzia Lemoinei Avlanche A low spreading bush with dense panicles of white flowers. 6-8 inch x Once Transplanted.....	12.00
Each x indicates one transplanting. 50 of same variety and size at 100 rate; 500 at 1,000 rate.		

Malus—Crab Apple

These plants for the decoration of northern gardens are of first importance. For many years we paid careful attention to development of a choice collection here in the nursery and study of the different species and hybrids. In most cases these trees are all produced from grafts, thus assuring reproduction of the true types and desirable qualities. A large collection of Malus varieties has been developed by the Arnold Arboretum at Boston, Massachusetts, and credit should be given by all Nurserymen for this fine assortment. The flowers, of course, are all of leading importance, although many varieties produce edible fruit and are highly valued on account of their peculiar picturesque forms and habits.

Variety

100

Malus Arnoldiana

Hybrid of Malus Floribunda. It has a low branched habit of the Malus Floribunda, but flowers and fruits are more than one-third larger. Flowers are red opening and pass through different shades, becoming almost white before the petals fall.

12-18 inch x\$20.00

Malus Atrosanguinea

Common red flowered Crab Apple seen in gardens. It is a broad branched low tree with rather double red showy flowers.

12-18 inch x 17.50

Malus Floiibunda

Considered by many persons the most beautiful of Crab Apples. It is a broad, round topped tree like shrub, sometimes 25 feet tall. The flowers are white when fully expanded. The fruit is about the size of a pea, yellowish brown.

12-18 inch x 17.50

Malus Niedzwetzkyana

Bark and wood tinged with red. Red juicy fruit and ripens in October, about one inch in diameter. Native of Turkestan and Southwestern Siberia.

12-18 inch x 20.00

Malus Ringo

As an ornamental tree it is valuable for the lateness of its abundant and fragrant flowers and handsome fruit which is oval, red or yellow, and from an inch to an inch and a half long.

12-18 inch x 17.50

Malus Sargentii

Discovered by Professor Sargent in 1892. A shrub from Northern Japan with wide spreading branches. Pure white flowers and bright yellow anthers and scarlet fruit which remains on the branches until Spring.

18-24 inch x 20.00

Malus Scheideckerii

Double flowers of bright rose color, lasting and of good substance. One of the best known and most popular of all Malus forms.

12-18 inch x 22.50

Malus Spectabilis Riversii Flora Pleno

Twenty-five to thirty feet high. Wide vase shaped crown. Pale pink flowers, semi-double, very fragrant. Fruit pale yellow, about three-fourths of an inch in diameter.

12-18 inch x 20.00

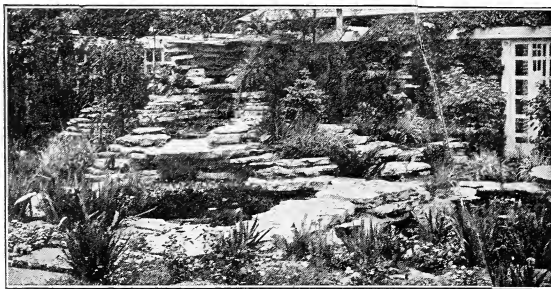

Malus Toringo

The Japanese plant, also known as Malus Seiboldii. Last of the Asiatic species to bloom. It has small white flowers produced in immense quantities and minute fruit which is bright red on some individuals and yellow on others.

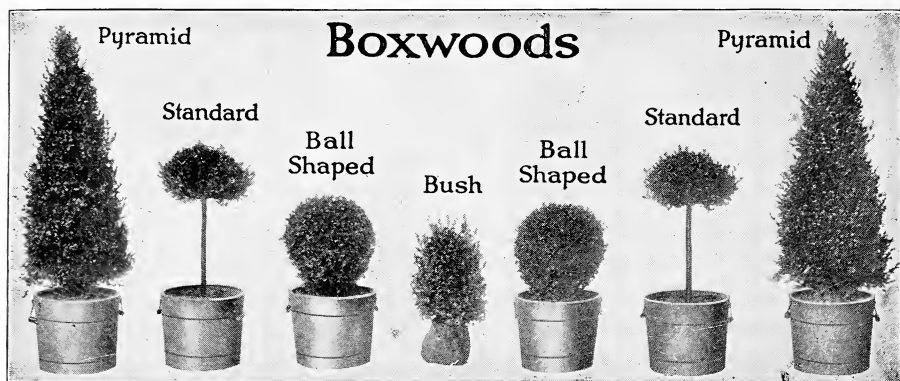

12-18 inch x 17.50

50 of same variety and size at 100 rate.

JAPANESE GARDENS AND ROCKERIES

For the construction of Japanese Gardens, Rockeries, etc., we offer the services of Mr. T. R. Otsuka, Landscape Architect, to those of our trade customers desiring his assistance. Mr. Otsuka has had plenty of experience along this line, having built some of the most notable Japanese Gardens in this country. Arrange with us for an interview or write for complete information.

Boxwood (*Buxus Japonica*)

These are choice plants grown in California by Roy F. Wilcox & Company. We have handled them several years and can assure our customers that stock is first-class. Delivery about May first.

XMAS TREES

Supply the
Xmas Tree Market
in Your Locality
With Home
Grown Trees

You can easily grow a patch of Xmas Trees to supply your local trade. Small transplanted sizes of Norway Spruce rapidly grow into money, bringing in business at the dull season. Each year wild trees are getting scarcer and it will be only a few seasons until the cutting of wild trees will be prohibited. You can start selling in three or four years at \$1.00 each and up. Planted at 2 feet each way you can plant about 10,000 trees per acre.

How to Reach Our Nursery

Visitors are always welcome. We are conveniently located only 42 miles north-west of Chicago.

When coming by the way of Chicago, you are directed to the C. & N. W. Depot on Madison Street, from where it is an interesting ride of one hour and thirty minutes direct to Dundee.

For an hourly service from Chicago, take the C., A. & E. Electric Line at Wells Street and Jackson Boulevard, direct to Elgin, transferring to the Dundee - Carpentersville car, getting off at Stop No. 4, from where it is but a two-minute walk direct to our office, which is located right on the nursery grounds.

Paved roads from Chicago bring you direct to our Nursery.
